

Basic Lifeboat Coxswain – Conventional Lifeboat

Book at maersktraining.com

AVAILABLE LANGUAGES

English, Norwegian

The course provides participants with the knowledge and practical skills required to perform the function of a conventional lifeboat coxswain, including preparation, mustering, evacuation, launching, manoeuvring, communication and emergency response.

Essential Information

Prerequisites

Participants must have completed: Basic Safety Training VHF/SRC Certificate

Who is it for?

Personnel who are required to perform the function of a conventional lifeboat coxswain.

Assessment

Participants are assessed throughout all practical training. If a participant does not successfully complete the practical training, the reason for the assessment outcome will be provided. At the end of the course, participants must complete a theoretical test. Participants who do not demonstrate achievement of the required competence objectives will not successfully complete the course.

Certification

Upon successful completion, you will receive a certificate valid for 4 years

Course content

• Emergency Preparedness

Emergency response organisation, command structure and reactions during emergency situations.

• Lifeboat Fundamentals

Basic introduction to conventional lifeboats and their use during evacuation.

• Mustering and Evacuation

Mustering, preparation of the lifeboat, embarkation and evacuation procedures.

• Launching and Manoeuvring

Launching the conventional lifeboat and manoeuvring it to a safe area.

• Communication

Radio communication, internal lifeboat communication and communication with emergency response personnel.

• Emergency Systems and Equipment

Use of emergency systems and equipment under different conditions onboard the lifeboat.

• Alternative Evacuation Means

Alternative evacuation methods, including liferafts and evacuation chutes.

Key Learning Objectives

- | | |
|---|---|
| 01 L01 – Describe the organisation and purpose of emergency preparedness on an offshore installation. | 02 L02 – Prepare a conventional lifeboat for evacuation. |
| 03 L03 – Organise and lead mustering and embarkation into the lifeboat. | 04 L04 – Communicate by radio, internally in the lifeboat and with the emergency response organisation. |
| 05 L05 – Launch the lifeboat from the offshore installation and navigate it to a safe area. | 06 L06 – Manoeuvre the lifeboat and manage conditions for persons remaining onboard at sea. |
| 07 L07 – Operate emergency systems and equipment appropriate to different conditions onboard the lifeboat. | 08 L08 – Describe launching and safe evacuation using alternative evacuation means, including liferafts and evacuation chutes. |
