

# Basic Lifeboat Coxswain - Skid Lifeboat

Book at [maersktraining.com](https://maersktraining.com)

## AVAILABLE LANGUAGES

English, Norwegian

The course provides participants with the knowledge and practical skills required to perform the function of a skid lifeboat coxswain, including emergency preparedness, mustering, evacuation, launching, manoeuvring, communication and use of emergency systems and equipment.

## Essential Information

### Prerequisites

Participants must have completed: Basic Safety Training VHF/SRC Certificate

### Who is it for?

Personnel who are required to perform the function of a skid lifeboat coxswain.

### Assessment

Participants are assessed throughout all practical training. If a participant does not successfully complete the practical training, the reason for the assessment outcome will be provided. At the end of the course, participants must complete a theoretical test. Participants who do not demonstrate achievement of the required competence objectives will not successfully complete the course.

### Certification

Upon successful completion, you will receive a certificate valid for 2 years

## Course content

### • Emergency Preparedness

Emergency response organisation, command structure and reactions during emergency situations.

### • Mustering and Evacuation

Mustering, preparation of the lifeboat, embarkation and evacuation procedures.

### • Communication

Radio communication, internal lifeboat communication and communication with emergency response personnel.

### • Alternative Evacuation Means

Alternative evacuation methods, including liferafts and evacuation chutes.

### • Lifeboat Fundamentals

Basic introduction to skid lifeboats and their use during evacuation.

### • Launching and Manoeuvring

Launching the skid lifeboat and manoeuvring it to a safe area.

### • Emergency Systems and Equipment

Use of emergency systems and equipment under different conditions onboard the lifeboat.

## Key Learning Objectives

- |                                                                                                                   |                                                                                                                                       |
|-------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------|
| <b>01</b> L01 – Describe the organisation and purpose of emergency preparedness on an offshore installation.      | <b>02</b> L02 – Prepare a skid lifeboat for evacuation.                                                                               |
| <b>03</b> L03 – Organise and lead mustering and embarkation into the lifeboat.                                    | <b>04</b> L04 – Communicate by radio, internally in the lifeboat and with the emergency response organisation.                        |
| <b>05</b> L05 – Launch the lifeboat from the offshore installation and navigate it to a safe area.                | <b>06</b> L06 – Manoeuvre the lifeboat and manage conditions for persons remaining onboard at sea.                                    |
| <b>07</b> L07 – Operate emergency systems and equipment appropriate to different conditions onboard the lifeboat. | <b>08</b> L08 – Describe launching and safe evacuation using alternative evacuation means, including liferafts and evacuation chutes. |
