

Basic Safety and Emergency Preparedness Refresher for Emergency Response Personnel

Book at maersktraining.com

AVAILABLE LANGUAGES

English, Norwegian

The course refreshes and further develops the knowledge, skills and attitudes required for active emergency response personnel, with focus on sea survival, evacuation methods, risk and barriers, survival equipment and helicopter evacuation. The same competence requirements apply to both the Standard and Blended delivery options.

Essential Information

Prerequisites

Participants must have completed Basic Safety Training and be an active member of an HLO or Search and Rescue Team. The prerequisite requirements depend on the selected delivery option: Face to Face Delivery: No additional pre-course learning. Blended Delivery: Participants must complete the required e-learning before attending the practical training. A link to the required e-learning will be provided before attendance.

Who is it for?

Offshore personnel undertaking Basic Safety Refresher training who are active members of one of the following emergency response teams:
Helicopter Landing Officer (HLO)
Search and Rescue Team

Assessment

Participants are assessed throughout all practical training. If a participant does not successfully complete the practical training, the reason for the assessment outcome will be provided.

Certification

Upon successful completion, you receive a certificate valid for 4 years.

Course content

• Sea Survival

Practical sea survival activities, including survival suits, water familiarisation and remaining safely in the water.

• Emergency Alerting

Relevant alerting and communication actions during offshore emergencies.

• HSE

Health, safety and environmental considerations, including risk awareness and safety barriers.

• Emergency Breathing System

Practical use of the emergency breathing system integrated with the survival suit.

• Liferafts

Practical use of liferafts during offshore emergency and evacuation situations.

• Evacuation Chute

Practical use of an evacuation chute as an emergency evacuation method.

• Helicopter Evacuation

Practical HUET exercises, including water familiarisation, inversion and organised evacuation.

Key Learning Objectives

01 L01 – Use relevant evacuation and lifesaving equipment during offshore emergency situations.

03 L03 – Use a survival suit with an integrated emergency breathing system correctly.

05 L05 – Apply practical sea survival techniques during emergency situations.

02 L02 – Identify relevant risks and safety barriers associated with offshore emergency response.

04 L04 – Demonstrate appropriate actions during helicopter evacuation exercises.
