IDIOMAS DISPONÍVEIS

Inglês, Norueguês

O curso oferece aos participantes o conhecimento e as habilidades práticas necessárias para liderar e coordenar atividades de resposta a emergências no local do incidente, incluindo comunicação, avaliação de riscos, coordenação de recursos, tomada de decisões e gestão de pessoal durante situações de emergência.

Informações essenciais

Pré-requisitos

Participants must have completed Basic Safety Training. Participants must also have either: Attended the practical part of a Search and Rescue course as an observer for a minimum of 2 days, or Completed a Search and Rescue Basic Course.

Para quem é?

On-scene commanders and emergency response personnel with responsibility for coordinating emergency response activities at the incident site.

Avaliação

Participants are assessed throughout all practical training. If a participant does not successfully complete the practical training, the reason for the assessment outcome will be provided. At the end of the course, participants must complete a theoretical test. Participants who do not demonstrate achievement of the required competence objectives will not successfully complete the course.

Certificação

Upon successful completion, you will receive a Maersk Training certificate

Course content

• Emergency Response Organisation

Organisation, roles, responsibilities, communication and coordination within the emergency response structure.

• Communication and Reporting

Communication with the control room, emergency response management and individual response teams.

• Personnel Safety

Risk assessment and measures to protect emergency response personnel during incident response.

• Normalisation

Principles and actions associated with returning from emergency response to normal operations.

• On-Scene Command

Leadership, decision-making, incident assessment, risk management and coordination of response teams at the incident site.

• Incident Assessment

Assessment and reporting of the situation, extent of damage, hazards and potential escalation factors.

• Response Coordination

Identification of required response activities and coordination of emergency response teams and resources.

• Stress and Crisis Management

Recognition and management of stress and crisis reactions during emergency situations.

Key Learning Objectives

01 L01 – Apply leadership and decision-making processes during an emergency situation.

03 L03 – Act as the emergency response management's source of information from the incident site.

05 L05 – Describe the situation, extent of damage and potential escalation factors at the incident site.

07 L07 – Communicate the required response and resources needed from individual emergency response teams.

09 L09 – Apply principles for normalisation following an emergency situation.

11 Objective

02 L02 – Establish and maintain communication with the control room and emergency response management.

04 L04 – Establish an incident command point and provide relevant information to emergency management and response teams.

06 L06 – Assess risks and take appropriate measures to protect the safety of emergency response personnel.

08 L08 – Coordinate emergency response teams and activities at the incident site.

10 L010 – Apply principles for normalisation following an emergency situation.
