

# Escape Chute for the Norwegian Sector Addon

Book at [maersktraining.com](https://maersktraining.com)

## AVAILABLE LANGUAGES

Norwegian

The course provides participants with the knowledge and practical experience required to use an evacuation chute as an emergency evacuation method offshore.

## Essential Information

### Prerequisites

No prerequisites.

### Who is it for?

Personnel who require training in the use of an evacuation chute before working in the Norwegian offshore sector. This typically applies to personnel who have completed offshore safety training for another sector, including the UK sector, but have not received practical training in evacuation chute use.

### Assessment

Participants are assessed throughout the practical training. If a participant does not successfully complete the practical training, the reason for the assessment outcome will be provided.

### Certification

Upon successful completion, you will receive a certificate demonstrating their competence in the use of an evacuation chute for the Norwegian offshore sector.

## Course content

### • Theory

Introduction to the use of evacuation chutes and relevant safety considerations before practical training.

### • Practical Training

Practical exercises and demonstrations in the safe use of an evacuation chute.

## Key Learning Objectives

**01** L01 – Describe the basic principles for safe use of an evacuation chute.

**02** L02 – Demonstrate safe use of an evacuation chute during practical exercises.
