

Módulo Adicional do Sistema de Respiração de Emergência com Ar Comprimido (CA-EBS) para o Setor do Reino Unido

Reserve em maersktraining.com

IDIOMAS DISPONÍVEIS

Inglês, Norueguês

O curso oferece aos participantes conhecimentos básicos e habilidades práticas na inspeção, implantação e uso de um Sistema de Respiração de Emergência com Ar Comprimido (CA-EBS) para situações de emergência em helicópteros. O treinamento é realizado de acordo com os requisitos da OPITO para o setor offshore do Reino Unido.

Informações essenciais

Pré-requisitos

No prerequisites.

Para quem é?

Personnel who are required to travel by helicopter in the UK offshore sector and require training in the use of a Compressed Air Emergency Breathing System (CA-EBS).

Avaliação

Participants are assessed throughout all practical training. If a participant does not successfully complete the practical training, the reason for the assessment outcome will be provided. At the end of the training, participants must complete a theoretical test. Participants who do not demonstrate achievement of the required competence objectives will not successfully complete the course.

Certificação

Upon successful completion you will receive a certificate in accordance with OPITO requirements for the UK offshore sector.

Course content

• Introduction

Introduction to CA-EBS and its purpose during helicopter emergency situations.

• Compressed Air in Emergencies

Principles for using compressed air during helicopter emergency situations.

• Practical CA-EBS Use

Practical inspection, deployment and use of the CA-EBS.

• Emergency Breathing Systems

Differences between relevant emergency breathing systems.

• CA-EBS Hazards

Hazards and safety considerations associated with the use of compressed air.

• Lifejacket Deployment

Correct deployment of the lifejacket during an emergency situation.

- **Helicopter Escape**

Practical actions associated with exiting a helicopter using the CA-EBS.

Key Learning Objectives

01 L01 – Inspect the lifejacket and CA-EBS before use.

03 L03 – Explain how compressed air is used during an emergency and identify associated hazards.

05 L05 – Deploy the lifejacket correctly.

02 L02 – Describe the differences between relevant emergency breathing systems.

04 L04 – Deploy and use the CA-EBS correctly during a practical exercise.

06 L06 – Demonstrate the actions required to exit a helicopter using a CA-EBS.
