Offshore MOB Boat, Lifeboat & Fast Rescue Boat Coxswain Refresher with STCW A-VI/2-2 Refresher

Book at maersktraining.com

AVAILABLE LOCATIONS
Esbjerg

AVAILABLE LANGUAGES
English

The skills required to take command of a MOB boat, lifeboat, or fast rescue boat in an offshore emergency are not maintained through drills alone. This refresher course ensures that designated personnel keep all three boat command certifications current in a single efficient programme at Maersk Training's Esbjerg facility. Revalidating MOB Boat Coxswain (MOB Båd Coxswain), Lifeboat Captain (Redningsbådsfører), and Fast Rescue Boat Coxswain (Hurtig Redningsbåd Coxswain) together means one set of joining arrangements, shared expiry dates, and hands-on practical time on the water that refreshes real operational competence across all three roles. The course meets the requirements of the 1995 STCW Convention, Sections A-VI/2-1 and A-VI/2-2, and is approved by the Danish Maritime Authority.

Essential Information

Prerequisites
Delegates must hold a valid or recently expired MOB Boat Coxswain certificate, Lifeboat Captain certificate, and Fast Rescue Boat Coxswain certificate. A valid medical booklet for seafarers (blue book) or equivalent offshore medical health certificate is required. A completed medical self-declaration form must be signed prior to commencing the course. Delegates must be physically capable of participating in all practical exercises, including water-based activities.

Who is it for?
This course is designed for offshore installation personnel who hold all three boat command certifications and need to revalidate them before their expiry date. It is relevant across the oil and gas, renewables, and offshore maritime sectors in the Danish North Sea and beyond.

Assessment
Delegates are assessed entirely through direct observation of practical exercises conducted on the water, in accordance with the learning outcomes specified in STCW Sections A-VI/2-1 and A-VI/2-2.

Certification
Upon successful completion, delegates receive three refreshed certificates: Offshore MOB Boat Coxswain, Lifeboat Captain, and Fast Rescue Boat Coxswain. All three are valid for four years and share the same expiry date.

Course content

- **MOB Boat Coxswain**
  Inspection and readiness checks, maintenance, davit and release systems, launching and recovery, rough weather handling, navigation, survivor management, helicopter rescue, VHF, EPIRB, SART and pyrotechnics.
- **Lifeboat Captain**
  Roles and responsibilities, inspection and readiness checks, propulsion, steering and safety equipment, launching and manoeuvring, survivor management, emergency coordination, CPR, hypothermia and first aid.

- **Fast Rescue Boat Coxswain**
  Inspection and readiness checks, maintenance, emergency repairs, launching and recovery, high-speed manoeuvring, search patterns, environmental factors, casualty recovery, communication and pyrotechnics.

- **Freefall Lifeboat Coxswain**
  TEMPSC readiness and checks, passenger boarding, restraints, engine start systems, freefall launch, manoeuvring, compass and sea anchor use, towing, survivor recovery, radio, pyrotechnics and emergency equipment.

Key Learning Objectives

01 LO1 — Meet the requirements for acting as a MOB Boat Coxswain, including readiness checks, launching, recovery, boat handling, survivor management, navigation and communication during rescue operations.

02 LO2 — Meet the requirements for acting as a Lifeboat Captain, including lifeboat readiness, launching, manoeuvring, survivor management, emergency coordination and first aid.

03 LO3 — Meet the requirements for acting as a Fast Rescue Boat Coxswain, including readiness checks, launching, recovery, boat handling, search and rescue, casualty recovery and communication.

04 LO4 — Meet the requirements for acting as a Freefall Lifeboat Coxswain, including TEMPSC readiness, preparation and launch, manoeuvring, survivor recovery, towing and use of emergency equipment.
