LOCAIS DISPONÍVEIS
Esbjerg

IDIOMAS DISPONÍVEIS
Inglês

As habilidades necessárias para comandar um bote MOB, um bote salva-vidas ou um bote de resgate rápido em uma emergência offshore não são mantidas apenas por meio de exercícios. Este curso de reciclagem garante que o pessoal designado mantenha as três certificações de comando de bote atualizadas em um único programa eficiente na unidade da Maersk Training em Esbjerg. Revalidar o Coxswain de Bote MOB (MOB Båd Coxswain), Capitão de Bote Salva-vidas (Redningsbådsfører) e Coxswain de Bote de Resgate Rápido (Hurtig Redningsbåd Coxswain) juntos significa um único conjunto de procedimentos de admissão, datas de validade compartilhadas e tempo prático prático na água que renova a competência operacional real em todos os três papéis. O curso atende aos requisitos da Convenção STCW de 1995, Seções A-VI/2-1 e A-VI/2-2, e é aprovado pela Autoridade Marítima Dinamarquesa.

Informações essenciais

Pré-requisitos
Delegates must hold a valid or recently expired MOB Boat Coxswain certificate, Lifeboat Captain certificate, and Fast Rescue Boat Coxswain certificate. A valid medical booklet for seafarers (blue book) or equivalent offshore medical health certificate is required. A completed medical self-declaration form must be signed prior to commencing the course. Delegates must be physically capable of participating in all practical exercises, including water-based activities.

Para quem é?
This course is designed for offshore installation personnel who hold all three boat command certifications and need to revalidate them before their expiry date. It is relevant across the oil and gas, renewables, and offshore maritime sectors in the Danish North Sea and beyond.

Avaliação
Delegates are assessed entirely through direct observation of practical exercises conducted on the water, in accordance with the learning outcomes specified in STCW Sections A-VI/2-1 and A-VI/2-2.

Certificação
Upon successful completion, delegates receive three refreshed certificates: Offshore MOB Boat Coxswain, Lifeboat Captain, and Fast Rescue Boat Coxswain. All three are valid for four years and share the same expiry date.

Course content

- **MOB Boat Coxswain**
  Inspection and readiness checks, maintenance, davit and release systems, launching and recovery, rough weather handling, navigation, survivor management, helicopter rescue, VHF, EPIRB, SART and pyrotechnics.
- **Lifeboat Captain**
  Roles and responsibilities, inspection and readiness checks, propulsion, steering and safety equipment, launching and manoeuvring, survivor management, emergency coordination, CPR, hypothermia and first aid.

- **Fast Rescue Boat Coxswain**
  Inspection and readiness checks, maintenance, emergency repairs, launching and recovery, high-speed manoeuvring, search patterns, environmental factors, casualty recovery, communication and pyrotechnics.

- **Freefall Lifeboat Coxswain**
  TEMPSC readiness and checks, passenger boarding, restraints, engine start systems, freefall launch, manoeuvring, compass and sea anchor use, towing, survivor recovery, radio, pyrotechnics and emergency equipment.

Key Learning Objectives

01 LO1 — Meet the requirements for acting as a MOB Boat Coxswain, including readiness checks, launching, recovery, boat handling, survivor management, navigation and communication during rescue operations.

02 LO2 — Meet the requirements for acting as a Lifeboat Captain, including lifeboat readiness, launching, manoeuvring, survivor management, emergency coordination and first aid.

03 LO3 — Meet the requirements for acting as a Fast Rescue Boat Coxswain, including readiness checks, launching, recovery, boat handling, search and rescue, casualty recovery and communication.

04 LO4 — Meet the requirements for acting as a Freefall Lifeboat Coxswain, including TEMPSC readiness, preparation and launch, manoeuvring, survivor recovery, towing and use of emergency equipment.
