LOCAIS DISPONÍVEIS
Esbjerg

IDIOMAS DISPONÍVEIS
Inglês

Em uma instalação offshore, três funções distintas de comando de embarcações exigem três conjuntos distintos de habilidades: liderar uma resposta a homem ao mar como Timoneiro do Barco MOB (MOB Båd Coxswain), assumir o comando de uma evacuação em bote salva-vidas como Capitão do Bote Salva-vidas (Redningsbådsfører) e operar uma embarcação rápida de resgate em condições de resgate em alta velocidade como Timoneiro do Barco Rápido de Resgate (Hurtig Redningsbåd Coxswain). Este curso três em um qualifica os participantes em todas as três disciplinas em um único programa eficiente na unidade da Maersk Training em Esbjerg. Combinando instrução teórica com extensos exercícios práticos no mar, garante que o pessoal designado esteja pronto para assumir o comando em toda a gama de emergências com embarcações offshore. O curso atende aos requisitos da Convenção STCW de 1995, Seções A-VI/2-1 e A-VI/2-2, e é aprovado pela Autoridade Marítima Dinamarquesa.

Informações essenciais

Pré-requisitos
Delegates must be 18 years of age or above and hold a valid medical booklet for seafarers (blue book) or equivalent offshore medical health certificate. A completed medical self-declaration form must be signed prior to commencing the course. Some elements are physically demanding and take place on open water. Delegates must be physically capable of participating fully in all exercises.

Para quem é?
This course is designed for offshore installation personnel designated as coxswain or captain of a MOB boat, lifeboat, or fast rescue boat, who require initial certification across all three roles. It is relevant across the oil and gas, renewables, and offshore maritime sectors in the Danish North Sea and beyond.

Avaliação
Delegates are assessed entirely through direct observation of practical exercises conducted on the water, in accordance with the learning outcomes specified in STCW Sections A-VI/2-1 and A-VI/2-2.

Certificação
Upon successful completion, delegates receive three certificates: an Offshore MOB Boat Coxswain certificate, a Lifeboat Captain certificate, and a Fast Rescue Boat Coxswain certificate. All three certificates are valid for four years and share the same expiry date, simplifying recertification planning.

Course content

- **MOB Boat Coxswain**
  Construction, outfitting, maintenance, davit and release systems, launching and recovery, rough weather handling, compass steering, rescue patterns, survivor management, helicopter rescue, VHF, EPIRB, SART and pyrotechnics.
- **Lifeboat Captain**
  Roles and command duties, inspection and maintenance, propulsion, steering and safety equipment, launching and manoeuvring, survivor management, emergency coordination, CPR, hypothermia and first aid.

- **Fast Rescue Boat Coxswain**
  Construction, characteristics, equipment, maintenance, emergency repairs, launching and recovery, high-speed manoeuvring, search patterns, environmental factors, survivor recovery, casualty management, radios and pyrotechnics.

- **Freefall Lifeboat Coxswain**
  TEMPSC readiness, pre-launch checks, passenger boarding, restraint removal, engine start systems, freefall launch, manoeuvring, compass and sea anchor use, towing, recovery of persons in the water, radio, pyrotechnics and emergency equipment.

Key Learning Objectives

01 LO1 — Meet the requirements for acting as a MOB Boat Coxswain, including boat readiness, launching, recovery, navigation, survivor management and communication.

02 LO2 — Meet the requirements for acting as a Lifeboat Captain, including command duties, lifeboat readiness, launching, manoeuvring, survivor management and first aid.

03 LO3 — Meet the requirements for acting as a Fast Rescue Boat Coxswain, including readiness, launching, recovery, high-speed handling, search and rescue, casualty recovery and communication.

04 LO4 — Meet the requirements for acting as a Freefall Lifeboat Coxswain, including TEMPSC readiness, preparation, launch, manoeuvring, towing, survivor recovery and use of emergency equipment.
