

Offshore Norway Helicopter Underwater Escape Training (HUET)

Book at maersktraining.com

AVAILABLE LANGUAGES

English, Norwegian

The course provides participants with the knowledge and practical skills required to respond to a helicopter emergency, evacuate from a helicopter or simulator and use relevant survival and emergency breathing equipment. The course follows Offshore Norge guidelines and training requirements.

Essential Information

Prerequisites

The prerequisite requirements depend on the selected delivery option: Face to Face Delivery: No prerequisites. Blended Delivery: Participants must complete the required e-learning before attending the practical training.

Who is it for?

Personnel who will travel offshore by helicopter and require the helicopter evacuation component of Basic Safety Training. This course may be taken separately by participants who only require the helicopter evacuation element of the full safety course.

Assessment

Participants are assessed throughout all practical training. If a participant does not successfully complete the practical training, the reason for the assessment outcome will be provided. For Competence Objective 3.8, evacuation from a helicopter or simulator, practical evacuation exercises 1–4 are mandatory and must be completed. The basic course includes 6 helicopter evacuation exercises, while the refresher course includes 4 exercises.

Certification

Upon successful completion, you will receive a certificate valid for 4 years. For certified maritime personnel working on mobile offshore units, refresher training is required every 5 years.

Course content

- **HSE**
Health, safety and environmental considerations relevant to helicopter transport and evacuation training.
- **Water Familiarisation**
Practical exercises to develop confidence and appropriate behaviour in the water.
- **EBS-B**
Practical use of the EBS-B emergency breathing system integrated with the survival suit.
- **Helicopter Evacuation Theory**
Principles and procedures for helicopter emergency evacuation and survival at sea.
- **Helicopter Evacuation**
Practical evacuation exercises from a helicopter or simulator during simulated emergency situations.

Key Learning Objectives

- | | |
|---|--|
| <p>01 L01 – Describe emergency landing procedures and basic survival considerations following a helicopter emergency at sea.</p> | <p>02 L02 – Demonstrate safe evacuation from a sinking helicopter or helicopter simulator.</p> |
| <p>03 L03 – Use a survival suit with an integrated EBS-B emergency breathing system.</p> | <p>04 L04 – Apply appropriate actions during practical helicopter evacuation and water familiarisation exercises.</p> |
