

On-Scene Commander

Book at maersktraining.com

AVAILABLE LANGUAGES

English, Norwegian

The course provides participants with the knowledge and practical skills required to lead and coordinate emergency response activities at an incident site, including communication, risk assessment, resource coordination, decision-making and management of personnel during emergency situations.

Essential Information

Prerequisites

Participants must have completed Basic Safety Training. Participants must also have either: Attended the practical part of a Search and Rescue course as an observer for a minimum of 2 days, or Completed a Search and Rescue Basic Course.

Who is it for?

On-scene commanders and emergency response personnel with responsibility for coordinating emergency response activities at the incident site.

Assessment

Participants are assessed throughout all practical training. If a participant does not successfully complete the practical training, the reason for the assessment outcome will be provided. At the end of the course, participants must complete a theoretical test. Participants who do not demonstrate achievement of the required competence objectives will not successfully complete the course.

Certification

Upon successful completion, you will receive a Maersk Training certificate

Course content

• Emergency Response Organisation

Organisation, roles, responsibilities, communication and coordination within the emergency response structure.

• Communication and Reporting

Communication with the control room, emergency response management and individual response teams.

• Personnel Safety

Risk assessment and measures to protect emergency response personnel during incident response.

• Normalisation

Principles and actions associated with returning from emergency response to normal operations.

• On-Scene Command

Leadership, decision-making, incident assessment, risk management and coordination of response teams at the incident site.

• Incident Assessment

Assessment and reporting of the situation, extent of damage, hazards and potential escalation factors.

• Response Coordination

Identification of required response activities and coordination of emergency response teams and resources.

• Stress and Crisis Management

Recognition and management of stress and crisis reactions during emergency situations.

Key Learning Objectives

- | | |
|--|--|
| 01 L01 — Apply leadership and decision-making processes during an emergency situation. | 02 L02 — Establish and maintain communication with the control room and emergency response management. |
