

Revisão Básica de Segurança e Preparação para Emergências para Pessoal de Resposta a Emergências

Reserve em maersktraining.com

IDIOMAS DISPONÍVEIS

Inglês, Norueguês

O curso atualiza e aprofunda os conhecimentos, habilidades e atitudes necessárias para o pessoal ativo de resposta a emergências, com foco em sobrevivência no mar, métodos de evacuação, riscos e barreiras, equipamentos de sobrevivência e evacuação por helicóptero. Os mesmos requisitos de competência se aplicam tanto às opções de entrega Standard quanto Blended.

Informações essenciais

Pré-requisitos

Participants must have completed Basic Safety Training and be an active member of an HLO or Search and Rescue Team. The prerequisite requirements depend on the selected delivery option: Face to Face Delivery: No additional pre-course learning. Blended Delivery: Participants must complete the required e-learning before attending the practical training. A link to the required e-learning will be provided before attendance.

Para quem é?

Offshore personnel undertaking Basic Safety Refresher training who are active members of one of the following emergency response teams: Helicopter Landing Officer (HLO) Search and Rescue Team

Avaliação

Participants are assessed throughout all practical training. If a participant does not successfully complete the practical training, the reason for the assessment outcome will be provided.

Certificação

Upon successful completion, you receive a certificate valid for 4 years.

Course content

• Sea Survival

Practical sea survival activities, including survival suits, water familiarisation and remaining safely in the water.

• Emergency Alerting

Relevant alerting and communication actions during offshore emergencies.

• HSE

Health, safety and environmental considerations, including risk awareness and safety barriers.

• Liferafts

Practical use of liferafts during offshore emergency and evacuation situations.

• Evacuation Chute

Practical use of an evacuation chute as an emergency evacuation method.

• Helicopter Evacuation

Practical HUET exercises, including water familiarisation, inversion and organised evacuation.

- **Emergency Breathing System**

Practical use of the emergency breathing system integrated with the survival suit.

Key Learning Objectives

01 L01 — Use relevant evacuation and lifesaving equipment during offshore emergency situations.

03 L03 — Use a survival suit with an integrated emergency breathing system correctly.

05 L05 — Apply practical sea survival techniques during emergency situations.

02 L02 — Identify relevant risks and safety barriers associated with offshore emergency response.

04 L04 — Demonstrate appropriate actions during helicopter evacuation exercises.
