IDIOMAS DISPONÍVEIS
Inglês

A Revisão LOTO baseia-se no QET e no Responsável pelo LOTO, em vez de repetir o curso introdutório de bloqueio. Por meio da Introdução à Revisão LOTO, Etapas de Instrução de Bloqueio e Instruções de Bloqueio, os participantes desenvolvem uma abordagem sistemática para revisar a completude, precisão e usabilidade das instruções de bloqueio. A ênfase é colocada na identificação de omissões, suposições inseguras e inconsistências nas etapas de isolamento e verificação de energia, além da documentação de ações corretivas antes que as instruções sejam utilizadas.

Informações essenciais

Pré-requisitos
Mandatory prerequisites: valid QET (Qualified Electrical Training) and LOTO Person in Charge training.

Para quem é?
Technicians and other authorised personnel who have completed QET and LOTO Person in Charge and whose responsibilities include examining, validating or reviewing lockout instructions and the adequacy of planned energy isolation controls.

Avaliação
Written test (minimum 80% correct answers) and practical assessment.

Certificação
Upon successful completion you will receive a certificate valid for 2 years

Course content

- **LOTO Review Fundamentals**
  Introduction to LOTO review, including purpose, scope, responsibilities, and review criteria.
- **Instruction Review**
  Systematic examination of lockout instructions for completeness and accuracy.
- **Verification & Isolation Assessment**
  Verification steps and assessment of individual versus complex/group isolation instructions.
- **Practical LOTO Review**
  Practical review of example LOTO instructions, documentation of findings, and escalation requirements.
- **Instruction Structure**
  Lockout instruction steps, required structure, sequence, and control measures.
- **Energy Isolation Identification**
  Identification of equipment, hazardous energies, isolation points, and residual energy sources.
- **Error Detection & Corrections**
  Detection of missing, incorrect, or ambiguous instructions and required corrective actions.
- **Competency Assessment**
  Written knowledge test and practical assessment.

Key Learning Objectives

01 LO1 — Explain the purpose, scope and responsibilities associated with reviewing LOTO instructions.

02 LO2 — Identify the essential steps and information required in a complete lockout instruction.

03 LO3 — Evaluate whether hazardous energy sources, isolation points and stored-energy controls are adequately identified.

04 LO4 — Examine the sequence of isolation, lockout, verification, handback and restoration for completeness and clarity.

05 LO5 — Assess whether instructions appropriately address single-point or complex/group lockout arrangements.

06 LO6 — Identify missing, ambiguous or inconsistent steps and specify required corrections or escalation.

07 LO7 — Review a practical lockout-instruction scenario and justify whether the instruction is suitable for use under applicable site procedures.
