

a better learning experience

Training to be prepared
for the great powers
of both nature and technology

MAERSK
TRAINING

a complete range of training courses led by specialists

Maersk Training offers a wide range of training courses. We believe in specific training tailored to meet the needs of different industries and companies.

MARITIME

We offer a wide range of courses aimed at the maritime and offshore industries, from basic training to bridge resource management, anchor handling and dynamic positioning. In short, training that prepares people for the challenges of the modern maritime industry.

OIL & GAS

We provide training and education at all levels to meet the increasing demands for safety and to help secure profitability in the search for oil and gas. To do this we have developed a learning environment which we strive to make second to none.

WIND

Our advanced and effective one-stop training facilities deliver the safety and survival courses required by the wind industry, as approved by the major companies and structured to meet the needs of our clients.

SAFETY, SECURITY AND SURVIVAL

Our training improves safety and security to prevent costly accidents by preparing people for real life situations and developing their safety awareness. Training is based on both updated real life experience and accepted industry standards.

CRANE OPERATIONS

We offer training on all levels, generic or tailor-made, to combine safety and high performance in container terminals and the offshore industry.

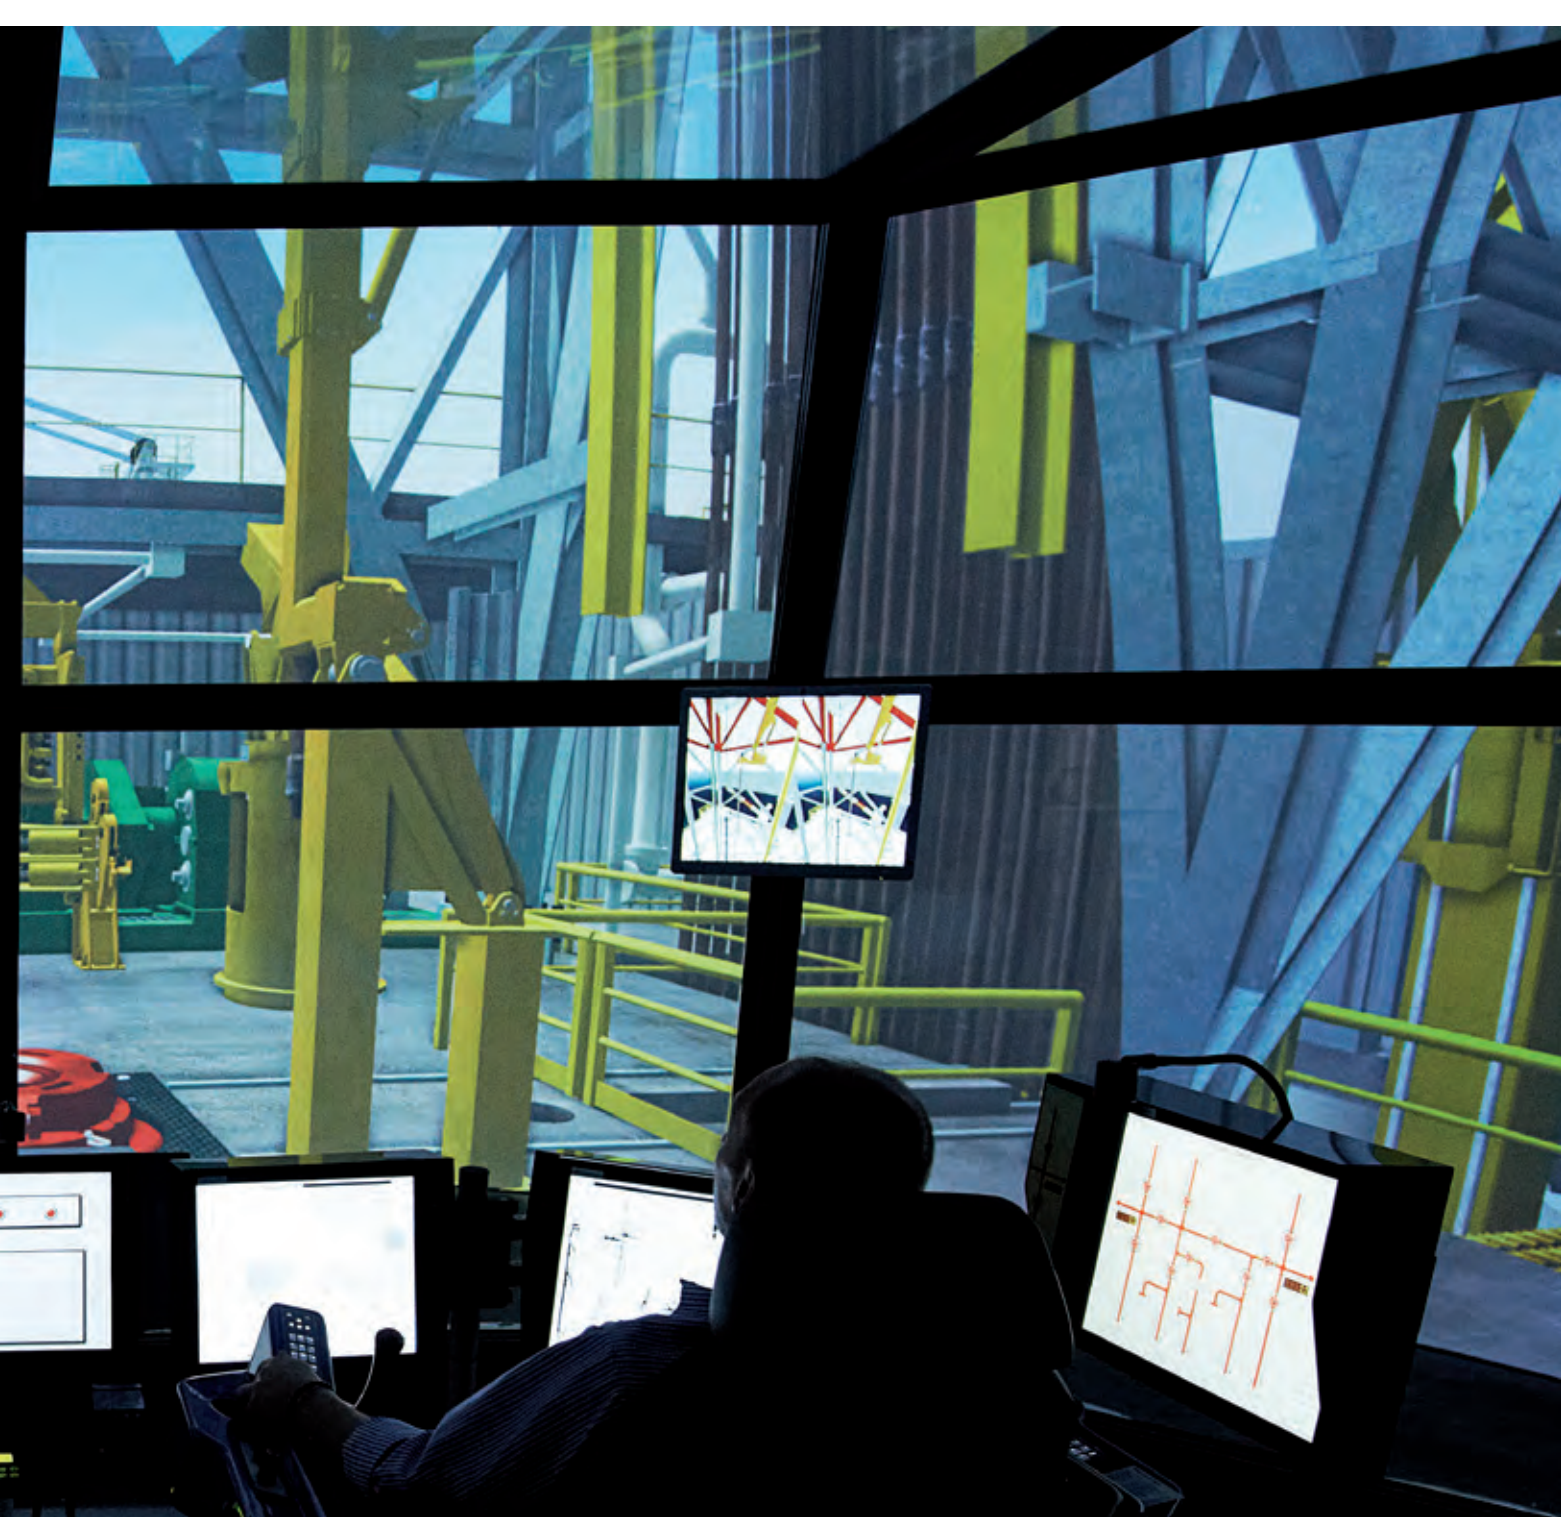

PEOPLE SKILLS

We focus on developing essential soft skills and required behaviour to improve performance, safety and communication in the workplace, from leadership to cross-cultural teamwork.

A person is seated in a control room, viewed from behind, interacting with a VR simulation. The simulation displays a complex industrial facility with various machinery, pipes, and structural elements. The person is using a VR controller and a keyboard. Several computer monitors are visible, showing data and charts. The overall scene is dimly lit, with the primary light source being the screens and the VR environment.

a better learning experience

We strive to provide a better learning experience. The goal is to achieve the highest learning level from a training session – use what you learn and you will improve your performance and safety behaviour.

Maersk Training covers a wide field of offshore industries and training needs, targeting each field with specific expertise. But we always teach and train according to our basic values, a Maersk Training way of thinking with “Uprightness, Humbleness and Constant Care” in mind.

BASED ON A SAFETY CULTURE

Risks can be minimised. This is true for human health and lives, and for the economy, production and the environment. Maersk Training is based on a safety culture that focuses on eliminating risks by being prepared. From technical skills to communication, our training improves both performance and safety for increased competitive edge.

LEARNING BY EXPERIENCE

Learning is better retained when it is put into use. Our training is about more than theory – it is based on methods that involve people and bring knowledge into operation. This philosophy goes for both the classroom and for practical training.

OUR INSTRUCTORS

Operational experience and knowledge about the working environment is important to train and affect delegates. Therefore, our instructors are experts picked directly from their industries. They are regularly circulated back to work for some years before returning, in order to maintain their practical skills and to follow the development of their profession.

GLOBAL TRAINING NEEDS

Our workplace is truly global. We train people from all over the world, and we travel to train people where they are. Maersk Training is represented where the maritime and offshore energy production industries are at work, with training centres in major hubs worldwide.

Maersk Training in Aberdeen

Your teams working in the oil & gas and maritime industries are in for a special training experience in Aberdeen – extending their knowledge and improving their skills.

At Maersk Training in Aberdeen, you can choose from a wide range of courses in Emergency Management, Fire Fighting, Emergency Response and Rescue Vessels and Offshore Survival. This is complemented by an extensive portfolio of internationally certified marine, safety and medically based courses. We are constantly developing new programs and training methods and are heavily involved with industry leading bodies, e.g. OPITO and the RenewableUK Skills and Strategy group to shape the training needs of the industry.

EMERGENCY MANAGEMENT AND FIRE FIGHTING

Your team members can get OPITO approved emergency management training in offshore operations. They will receive high-level training during all of our OPITO and STCW certified firefighting courses, which are delivered

by current operational firefighters with more than 25 years experience.

EMERGENCY RESPONSE AND RESCUE VESSEL

You can choose from a wide range of OPITO approved courses in this category, carried out at our brand new Emergency Response and Rescue Vessel training facility in Stonehaven. Uniquely located on the East coast of Scotland to provide a training experience that is both comprehensive and highly realistic.

OFFSHORE SURVIVAL

Give your team members the tools to control ultimate conditions. We provide a complete range of offshore survival, management, safety, medical and people skills courses.

OIL & GAS COURSES

- OIM Legislation
- OIM Legislation Refresher
- OPITO Major Emergency Management (MEM)
- OPITO OIM Assessment

SAFETY COURSES

- Accident Investigation
- Breathing Apparatus
- Confined Space Awareness
- Confined Space Entry
- Confined Space Rescue
- COSHH Assessors
- COSHH Awareness
- Defibrillator Training
- Emergency First Aid
- Fire Warden & Fire Extinguisher
- First Aid at Work
- First Aid at Work Refresher
- Gas Tester Training
- H2S Awareness
- H2S with Breathing Apparatus
- IOSH Managing Safely
- IOSH Working Safely
- Manual Handling
- Offshore First Aid
- Offshore First Aid Refresher

- OPITO Further Offshore Emergency Response Team Leader (FOERTL)
- OPITO Further Offshore Emergency Response Team Member (FOERTM)
- OPITO Helideck and Team Member Combined
- OPITO Helideck Emergency Response Team Member (HERTM)
- OPITO Offshore Emergency Response Team Leader (OERTL)
- OPITO Offshore Emergency Response Team Member (OERTM)
- STCW 95 Basic Safety Training
- STCW Advanced Fire Fighting
- STCW Fire Prevention and Fire Fighting
- STCW Medical Care Onboard Ship
- STCW Medical Care Onboard Ship Refresher
- STCW Medical First Aid

SURVIVAL COURSES

- OPITO Basic Offshore Safety Induction and Emergency Training (BOSIET)
- OPITO ERRV Crew Daughter Craft Coxswain
- OPITO ERRV Crew Fast Rescue Craft Boatman
- OPITO ERRV Crew Fast Rescue Craft Coxswain
- OPITO Further Offshore Emergency Training (FOET)
- OPITO Helicopter Underwater Escape Training (HUET)

- OPITO Minimum Industry Safety Training (MIST)

- STCW Proficiency in Fast Rescue Boats
- Universal (Norwegian waters) Escape Chute

PEOPLE SKILLS COURSES

- Assertiveness and Self Confidence
- Behavioural Safety
- Cultural Awareness
- Customer Service
- Effective Communication
- Effective Management & Supervisors
- Facilitating Workshops & Effective Meetings
- Manual Handling Assessors
- Manual Handling Train the Trainer
- Office Ergonomics Awareness
- Onshore Safety Rep
- Presentation Skills
- Procedure Writing
- Report Writing
- Safety Ambassador
- Safety Leadership
- Stress Management
- Team Building
- Time Management
- Train the Coach
- Train the Trainer

"Excellent training and knowledge from all instructors! The new technologies and procedures which were passed on proved to be an excellent and beneficial improvement to the techniques I had previously used".

*Ronnie Clarkson,
Production Operator*

Maersk Training in Chennai

Your teams working in the maritime industries in India and across the Asia Pacific Region are in for the most effective training in our Chennai facility – or at a location of your choice.

Established in 2006, Maersk Training in India today offers an extensive program focusing on maritime, safety, crane and people skills training. Your employees will gain new experience and benefit from our learning process that is mainly based on activity.

CONVENIENCE AND CUSTOMIZATION

You can plan the training of your teams in the most convenient and cost-effective way, with the instructors of Maersk Training being very mobile and ready to deliver onsite programs across Asia at a short notice.

As an importantly added benefit, training programs can be designed and customized to suit your exact needs with pre - and post assessment tools if required.

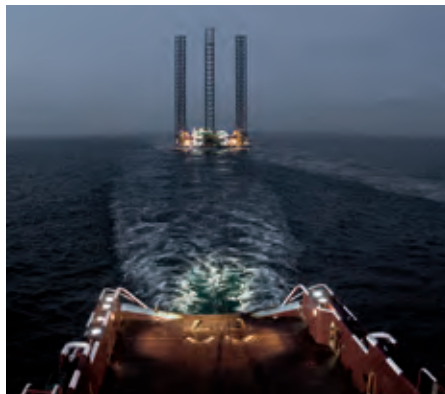

A COMPLETE PORTFOLIO

Maersk Training in Chennai is moving towards having a complete portfolio of post sea maritime training programs, and being a major player in people skills programs across corporate India.

“Maersk Training has set the benchmark for other training establishments to aspire to”.

Det Norske Veritas (DNV).

- Empowering Teams
- Feedback and coaching skills
- Interpersonal Skills and working effectively
- Presentation Skills
- Sales and Marketing Training
- Symbiosis – The Art of Interdependence
- Team Awareness Training
- Tipping Point Leadership – Change Management

"The safety of our employees is our first priority. Through Maersk Training they acquire good skills within safety training and awareness".

Semco Maritime

Maersk Training in Esbjerg

Your teams working in the oil & gas, maritime and wind industries can look forward to the most intensive and effective training in Esbjerg. Service, flexibility and quality define this Maersk Training facility, offering modern state-of-the-art facilities.

Ensuring the safety for your operational employees in these industries is our main training focus. The need for specific technical knowhow, when working in the wind industry, is also met by our training. Your team members will be taken to the high level of competence, which is required to solve their daily tasks.

COST EFFECTIVE SOLUTIONS

Your team members will complete an intense training programme focusing on basic safety and technical skills. We make sure that all participants will acquire the relevant certificates – ready to work at a higher level when returning to their companies.

Saving time and money for you is a priority to Maersk Training, and every programme is carried out in the most cost-effective way. We provide a “one-stop-shop” with all courses planned back-to-back, since you should only be without your team members for the shortest time possible.

CONSTANTLY DEVELOPING FOR YOU

Being part of a larger group, Maersk Training in Esbjerg is regularly able to offer your teams newly developed courses – or enhancements of the existing training programmes – since we have access to a considerable in-house operational experience within a variety of disciplines.

You can also benefit from our package solutions. They cover all kinds of safety related programs, and more advanced technical and simulation courses – suited to meet the specific needs of our customers.

Last but not least, your team members can look forward to meeting our trainers and specialists. We are proud to offer you the services of such a highly qualified, motivated and service-minded staff – ready to take your employees further.

Maersk Training in Newcastle

Your teams working in the oil & gas, maritime and offshore wind industries are offered the most complete and effective training in Newcastle. Our brand new facilities are designed to inspire your employees as we extend their ability to control even the most critical situations.

To ensure you get maximum value, we offer a full training solution based on a mixture of classroom based, practical and on-site training, tailored to meet your individual requirements. High quality training is granted, as we hold important accreditations from industry leading bodies.

FIRE FIGHTING AND MARITIME SIMULATORS

Your team members are offered a broad range of OPITO and STCW certified firefighting courses, and they will receive high-level training delivered by current operational firefighters with more than 25 years experience.

Simulator training for your employees is a key benefit of our specialised programs for the maritime industry. Your teams will be met by challenges as close to real working conditions as they can get, and they will be taught and instructed by former seafarers who bring their personal experiences into the training.

OFFSHORE SURVIVAL

Give your team members the tools to control ultimate conditions. We provide a complete range of offshore

survival, management, safety, medical and people skills courses.

WIND TECHNICAL TRAINING

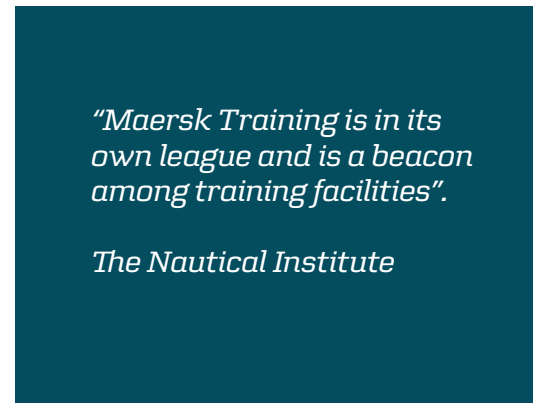

If you are looking for the highest level of training for your wind teams, we offer a complete package. We are the only independent centre in the UK accredited to provide Siemens Level 2 & 3 Technical Training.

As the first training centre in the UK to be accredited by the Global Wind Organisation (GWO), we offer all 5 modules of the GWO Basic Safety Training (BST) and the GWO Basic Safety Training Refresher (BSTR), alongside RenewableUK Work at Height and Rescue.

To ensure that your team members are fully trained to work on any Wind Farm site, we offer to combine the GWO and RenewableUK Work at Height & Rescue courses into 2 days. This will also save you time and money.

Please follow the QR link to see a Newcastle introduction video.

Maersk Training in Rio de Janeiro

Your teams working in the maritime and offshore industries based in Brazil are offered comprehensive training programs to extend their knowledge and sharpen their skills.

At the Maersk Training facility in Rio de Janeiro, your employees can attend both generic and specialised courses including maritime, offshore, and drilling training – plus a wide range of NR (Regulatory Norms), safety, security, and language programs. If you want the most effective training of your crane teams, the Maersk Training centre in Santos, SP, is specialised in this field.

Striving to be on the leading edge, our training facility in Rio de Janeiro is using top of the line maritime and drilling simulators for advanced technical as well as certification training.

THE FLEXIBILITY OF MORE LOCATIONS

Furthermore, our NR (Regulatory Norms) Instructors are able to provide your team members with essential safety training on board vessels of your choice or at your facilities – to meet your immediate and long-term needs.

Looking to upgrade the competencies of your crane teams, you also have the benefit of choosing between several

locations. Our portable crane simulators are not only used in the port of Santos, São Paulo, but also in Navegantes and Itajaí in Santa Catarina.

HIGH QUALITY TRAINING

The training of your teams will take place both onshore and offshore, with our highly experienced staff providing quality, flexibility and course customisation opportunities unmatched in the Brazilian market.

Our state of the art facilities are designed to offer you training at the highest level - including IWCF certified well control training, DP training accredited by Nautical Institute, Anchor Handling, and Ship Handling along with many other courses.

If you require specialised training, e.g. simulating specific wells to be drilled or scenarios for advanced anchor handling operations, Maersk Training can offer customised sessions to meet your exact demands.

MARITIME COURSES

- Anchor Handling Simulation
- Dynamic Positioning (DP) Advanced Simulation
- Dynamic Positioning (DP) Basic Induction
- Dynamic Positioning (DP) Sea Time Reduction
- ECDIS
- Harbour Simulation Projects
- Maritime Security Awareness - IMO 3.27
- Maritime Security Duties - IMO 3.26
- Maritime Technology Basic
- Ship Handling Offshore Vessels
- Shipboard Safety Workshop (SSW)
- Steel Wire Rope Course

- Technical Assessment for Navigators
- Theoretical Deep Water Anchor Handling (AH)

OIL & GAS COURSES

- Drill Through Equipment
- Drilling Calculations
- IWCF Rotary Drilling Well Control

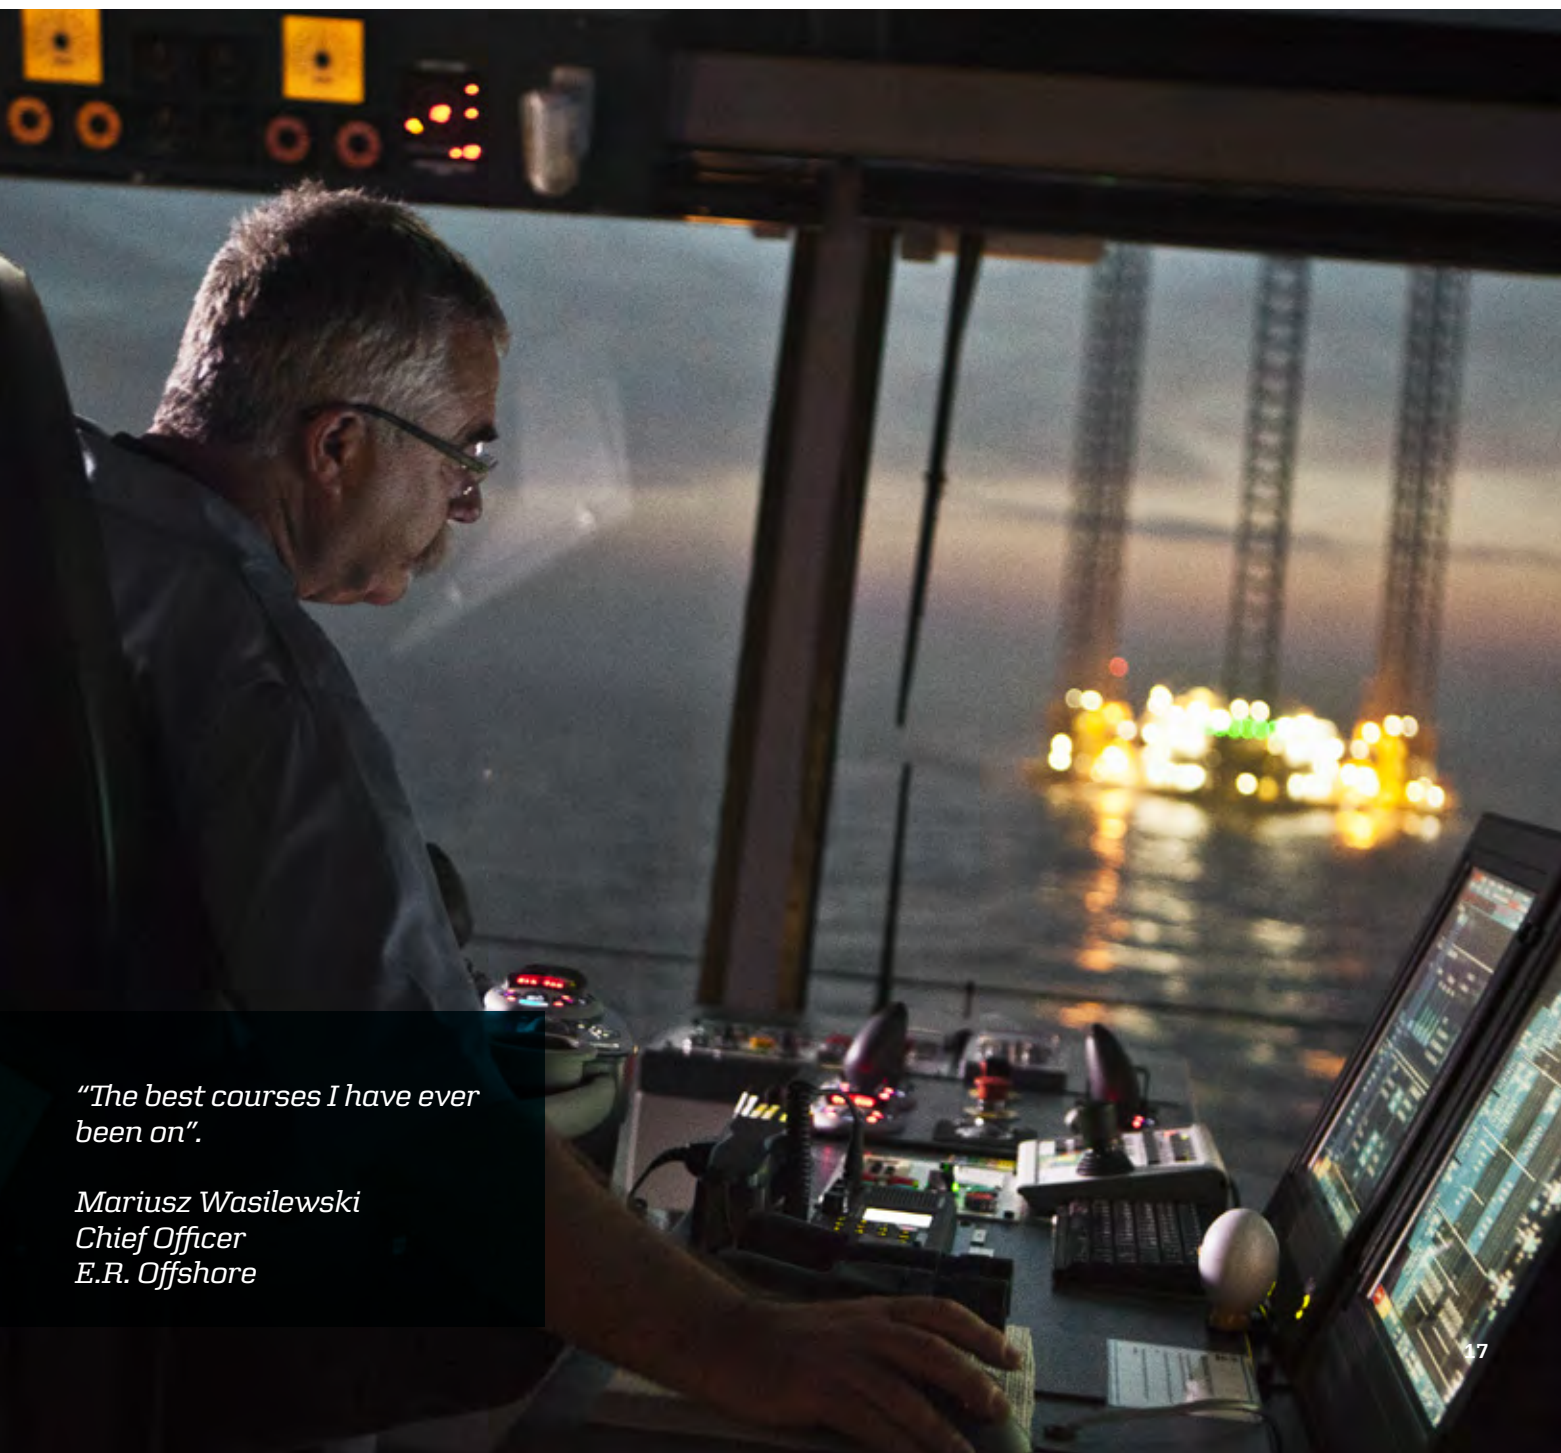

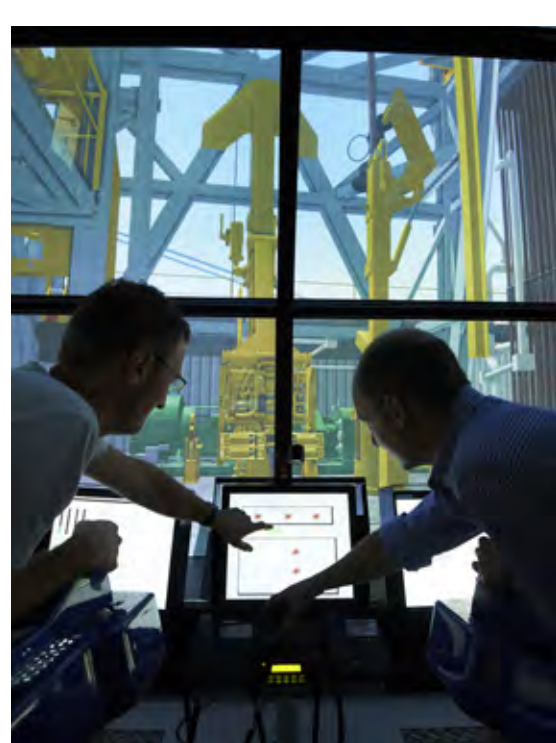

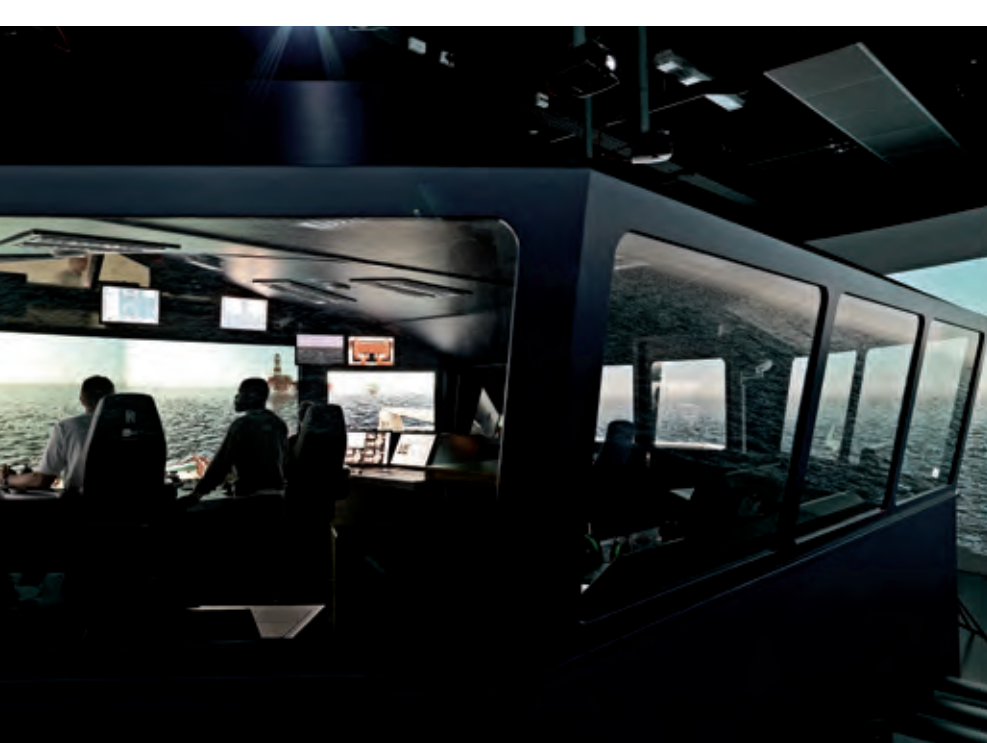

CRANE COURSES

- Fork Lifting
- Mobile Harbour Crane
- Reach Stacker
- Rubber Tyred Gantry crane
- Ship to Shore Crane

- Technical Assessment for Crane Drivers
- Terminal Tractor

PEOPLE SKILLS COURSES

- On board Language Training
- PEAT – Programa Educacional ao Trabalhador (Environmental Labour Program) – as per IBAMA (Brazilian Environmental Agency) guidelines
- Safety Perception Course – on board and offshore
- Safety Personality Assessment
- Technical English
- Technical Translation services

*"The best courses I have ever
been on".*

*Mariusz Wasilewski
Chief Officer
E.R. Offshore*

Maersk Training in Stavanger

Your teams working in the oil & gas industry will be trained by highly experienced specialists in Stavanger – one of the primary hubs for the industry surrounding the North Sea. Your employees will be offered the most advanced technology, including simulators like The Intellectus hiDRILL.

You can choose between courses ranging from basic training of junior drilling teams to advanced well control, and “train the trainer” programs. Striving for high quality in meeting today’s training needs, we are constantly developing both the training process, and the tools used for training and education at all levels.

Open courses range from introduction courses for non-technical teams to IWCF certification courses.

SPECIAL SIMULATOR SESSIONS

To enhance your teams’ competencies in handling today’s challenging wells and exploration at deeper waters, Maersk Training in Stavanger offers special sessions in The Intellectus hiDRILL. Your teams will be met by challenges as close to real working situations as they can get. The ideal combination of a highly advanced model and an accurate topside simulator enables Maersk Training to offer you the most realistic training based on actual wells and real data.

The Intellectus hiDRILL is a world leading down-hole simulator, combining the topside feel of the drilling operation with a high precision downhole model.

The simulator consists of three parts:

1. The hydraulic flow model calculating the effect of the hydraulics throughout the circulation system. Ensuring that the correct output values to the downhole torque and drag model are available.
2. The downhole torque and drag model is already used in several offshore installations and has proven itself as a valued and effective system. It ensures real-time feedback, providing operators with an early warning system of issues in the well.
3. The final part of the simulator is the topside model, consisting of two Driller Chairs, a large view of the drill floor and derrick – together with separate monitors providing details of pumps, valves, etc.

“By having Maersk Training run an in-house course at our facilities in Sandefjord, Norway, we had the option to adapt the content to meet our specific needs”.

*Marius Myhra
Competence Developer
Agility Group*

OIL & GAS COURSES

- Coiled Tubing Drilling – CTD
- Extended Reach Drilling – ERD
- High Pressure High Temperature – HPHT
- Introduction to Completion & Well Maintenance
- Introduction to Drilling Technology
- Introduction to General Platform Operations
- Introduction to Petroleum Geology
- Managed Pressure Drilling – MPD
- Stuck Pipe Prevention
- Through Tube Rotary Drilling – TTRD
- Well Control

PEOPLE SKILLS COURSES

- Cross culture awareness
- Daily team management
- Difficult conversations
- Leading in action
- Leading teams in action
- Motivation and Conflict management
- Performance appraisal planning
- Personal & Professional Assessment
- Personal & Professional planning
- Presentation technique
- Situational leadership
- Team acceleration course
- Time & stress management

Many simulator-based courses I've been to you know what you're expecting, it's a fairly bland simulator but this thing is world-class here. It's amazing, it is as realistic as you can get. You have all these different pods you can tie in together to make a whole real-life scenario".

*Robert Dysart,
Company man,
Conoco-Phillips*

Maersk Training in Svendborg

Your maritime and offshore teams are in for the most innovative and effective training in Svendborg. The first established Maersk Training facility in the world - and now the focal point for development and delivery of a wide array of industry leading courses.

Using a whole new generation of simulators and techniques, your teams will be met by challenges as close to real working situations as they can get. Traditional methods are still part of everyday training, but with the industry-leading simulation complex, fresh approaches to learning are setting new standards of efficiency and competencies - particularly at team level.

THE TRUE VALUE

You can choose from a broad portfolio of maritime, crane and off-shore drilling related courses. In addition the people skills department provides essential assistance in selecting and maintaining the right personnel – and in enabling everyone on your teams to communicate freely, accurately and effectively.

The true value of training complete vessel or rig teams is evident. You will experience how our advanced safety and performance improving programs – linking cross

functional team training together – will have a direct impact on safety, operation and profitability.

INDUSTRY KNOWLEDGE CENTRE

The whole Maersk Training complex in Svendborg is designed to maximize the learning process for all participants – making sure they enjoy every minute of their stay. This includes comfortable accommodation and excellent food in our private hotel and restaurant.

For your company, choosing Maersk Training will give your team members a better learning experience. In this industry knowledge centre, they will be inspired by the most advanced facilities and high-end training experts. Provided by Maersk Training together with leading players of the industry, joined in the ambition of setting tomorrows training standards.

Maersk Training in Dubai

Your teams working in the oil & gas, offshore/supply, and tanker industry, are offered training at the highest level in Dubai, as Maersk Training and Elcome International have joined forces to provide this essential service.

The importance of the Middle East - as an economic dynamo and as a hub - has created an increased demand for maritime training in this region. Your employees can look forward to a very effective learning process, offered in cooperation with our partner since 2011, Elcome International, the major Middle East technology supplier to the maritime industry.

You will benefit from a simulation-lead training facility set up at Elcome's Dubai headquarters to carry out Maersk Training's range of globally recognized training programs.

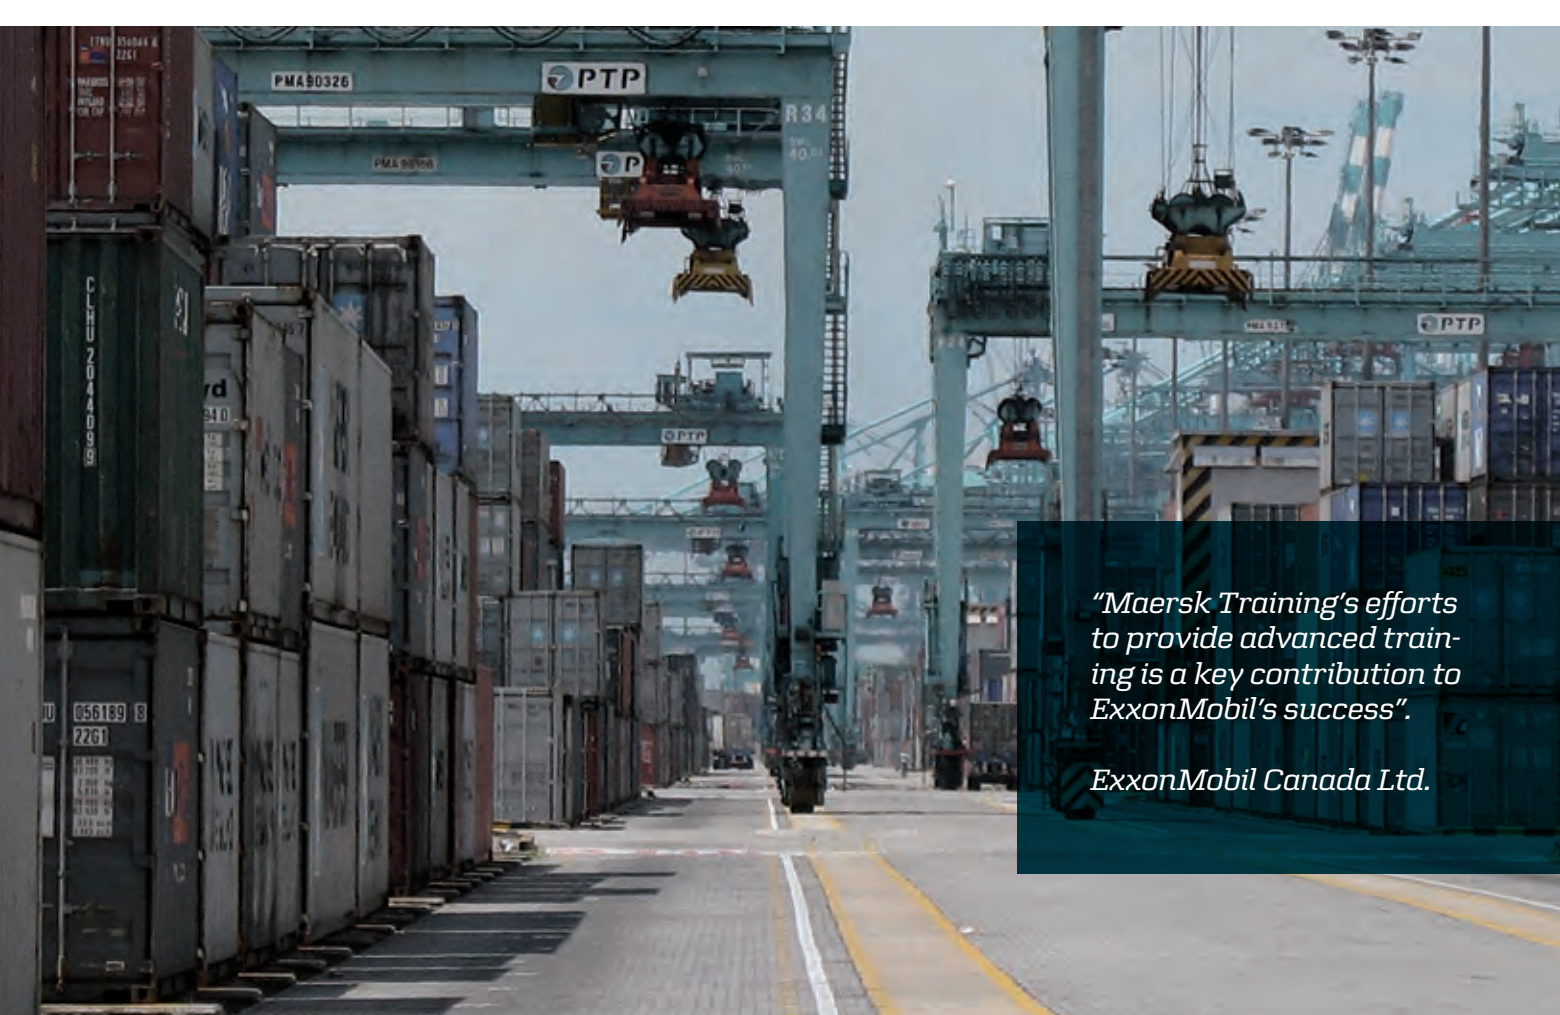

Using locally-based Maersk Training certified trainers – or specialist instructors flown in from other Maersk

Training facilities – Dynamic Positioning courses, both basic and advanced, are conducted on a regular basis. Maersk Training is globally recognized by the Nautical Institute as a certified provider of Dynamic Positioning training. These courses have been supplemented by a whole range of customer-specific courses.

Your team members will find themselves in a dynamic training nucleus attracting participants and companies from a wide radius expanding as far as West Africa, southern Europe and the Caspian Sea.

MARITIME COURSES

- Dynamic Positioning (DP)
Advanced Simulation
- Dynamic Positioning (DP)
Basic Induction

"Maersk Training's efforts to provide advanced training is a key contribution to ExxonMobil's success".

ExxonMobil Canada Ltd.

Maersk Training in Singapore

Your teams working in the offshore, supply and tanker industry are in for the most effective training in Singapore – the maritime hub of South East Asia.

We firmly believe that training should be offered on the doorstep of our clients, and Singapore is one of the most active doors used by the maritime industry in recent years.

Maersk Training has partnered with Marine Technologies – the one-stop resource for the shipping and offshore industries in the area – in establishing the facility. Building on a five-year cooperation, the two MT's offer your employees a wide range of programs, mainly carried out at Marine Technologies' headquarters.

You will benefit from our focus on meeting the challenges of the offshore, supply and tanker industry. Dynamic Positioning – both basic and advanced courses for the offshore supply industry – are conducted on a regular basis.

The growing number of courses also includes customer-specific training responding to requests for ship handling and DP Assessment. Maersk Training is globally recognized by the Nautical Institute as a certified provider of Dynamic Positioning training.

MARITIME COURSES

- Dynamic Positioning (DP)
Advanced Simulation
- Dynamic Positioning (DP)
Basic Induction

"I can't imagine any facility anywhere in the world being equal to this. I think it says a lot about Maersk, their commitment to their employees, to their company as a late deepwater drilling company and also to their customer because the quality of the equipment they are providing us and the training they give their employees is very good – I've been very impressed."

*Randy Ratliff,
Company man,
Marathon Oil*

competence the knowledge to perform

Accreditation is the key to knowing the level of competences of your teams enabling them to carry out specialist tasks.

Competence vs. certificate is the core DNA in the global aim of Maersk Training because of the fact, that the two not necessarily relate to each other. At our centres worldwide your teams are trained to be competent – not just to receive a certificate or to be approved.

SETTING HIGHER BENCHMARKS

Since day one, the company has striven to set ever higher benchmarks. This has been recognised by Det Norske Veritas, DNV, awarding Maersk Training with the Certificate of Excellence. This recognition has been supported by other industry quality mediators and standard bearers including the IWCF, IADC and the Nautical Institute. Today Maersk Training enjoys the opportunity of cooperating with the industry – sharing the views on its future – and making relevant changes and progress through that awareness.

This search for constantly developing the quality of the courses offered to your teams marks our approach to knowledge and competences. It is essential to meet the demands and expectations of every participant – of those who send them – and for the fields in which they work. Maersk Training is monitoring the industry closely to provide the competencies that enable your teams to perform at the highest level in terms of both technical and safety practices.

GLOBAL BUSINESSES DEMAND UNIVERSAL STANDARDS

The most universal accreditation of all is the driving licence. It qualifies the holder to pick up a hire car and legally drive on unfamiliar roads anywhere on the planet. However, the manner in which it is obtained differs a lot. In many countries, you study and pass written as well as practical tests, in others you just need to switch on the engine and drive a few metres. Not to mention the countries in which the exchange of money is enough to secure your driving permission.

This global flawed logic drives Maersk Training to push the boundaries of accreditation in the fields of the maritime, offshore and wind industries, ever upward. These are global industries demanding universal standards to secure high quality performances of every team - even in the most critical working situations. Indeed Maersk Training was founded because of a gap between certification and competencies which lead to a major accident in the North Sea.

This makes our goal of providing a better learning experience twin-fold. For your teams, both the learning process and the competences they obtain are unequalled in offshore training.
